

Regina

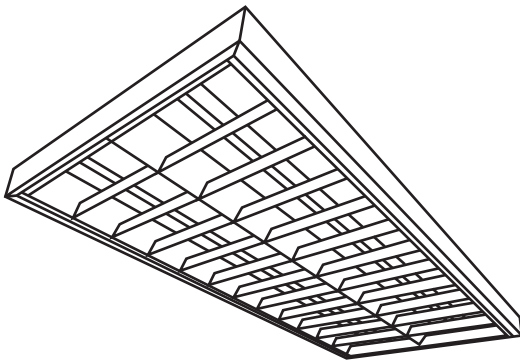

INTENDED USE

Regina series provides an economical energy saving 2 tubes, 3 tubes and 4 tubes T5 or T5 high output top mirror recess fixtures. Ideal for retail, educational and commercial applications requiring lighting load as low as 2 watts, 3 watts or 4 watts/square meter/100 lux. 2'x4', 2'x2', 1'x4' and 1'x2' Imperial and Metric sizes available to meet most general illumination layouts.

CONSTRUCTION AND OPTICS

Familiar industrial most widely used design for ease of installation to secure fixture to T-bar system with latch system hinged louver frame enable louver frame to hinged down and swing. Housing formed of high quality gauge sheet steel. Going through five-stage iron-phosphate pre-treatment ensures superior paint adhesion and rust resistance. Housing painted after fabrication with environmentally friendly, high-gloss, very high reflectivity epoxy powder-coat. High reflectivity mirror reflector achieved with anodized aluminium efficiently directs light downward. Louver cut-out and maximizes shielding even in shallow plenum applications and softens light distribution to deliver a balance amount of light to both vertical and horizontal surfaces.
