

Luxtron Road Force 3

DIMENSIONS

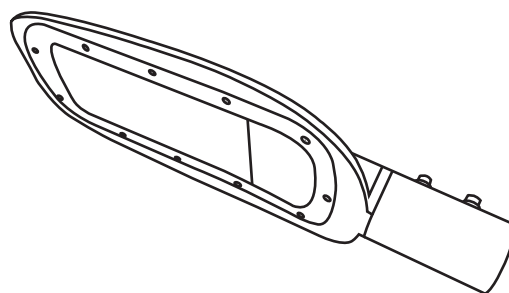

INTENDED USE

The Road Force 3 Series LED Street Light adopt the modern aesthetic streamline design, compact in structure and nice in appearance. With advanced high voltage linear constant current drive technology, without electrolytic capacitor, drastically reducing the components, improving the reliability and life time, the optimal cost-effective method. Application for roadway lighting, plaza lighting, park lighting and area lighting.

CONSTRUCTION AND OPTICS

Reliable decanting aluminum corrugated-fin composition, increasing the cooling area at utmost, reducing the light weight a lot. With high- quality SMD LED light source. A long lifespan. Lower temperatures. No mercury and lead. No UV. No infrared no radiation.
